PLS®

A Fluke Company

The PROFESSIONAL STANDARD

Our Edge

PLS manufactures the highest quality layout tools for the professional contractor.

We are dedicated to designing rugged and accurate laser tools for a lifetime of increased productivity and profit.

Fast, accurate and portable, PLS lasers save time and money versus traditional layout methods using bubble vials, plumb bobs or complex measurements.

Compare the advantages of using a PLS laser to traditional methods you now employ. When comparing PLS laser tools look for these quality features:

1. Beam quality will be bright, thin and crisp
2. Drop tested with water and dust Ingress Protection (IP)
3. Designed for the professional contractor with self-leveling technology

Our History

What sets PLS apart from the rest? Built by contractors for contractors, PLS tools were developed out of necessity by professionals with over 50 years of experience in commercial and residential interior and exterior layout. PLS founders were contractors first before becoming manufacturers of the finest laser alignment tools in the world.
