

STAIR SHIELD™

REUSABLE STAIR PROTECTION

**TOUGHER
THAN THE
JOBSITE.®**

Stair Shield™ is a reusable, heavy-duty, yet lightweight stair protection product.

Stair Shield™ protects every part of the stair including the tread, riser, and bullnose. The adjustable tread allows for dynamic coverage, protecting treads that are 10.25", 11", and 11.25" deep. The tread-trac™ technology promotes traction of the product to the stair while the two grip strips on top increase traction between the shoe and product. Stair Shield™ is offered in 34" wide and 40" wide options. *Patent Pending.*

HEAVY-DUTY

PRODUCT FEATURES

- Lightweight, strong and durable
- Offered in 34" and 40" width
- Protects 10", 11", and 11.25" deep stair treads
- Protects all parts of the stair
- Impact resistant
- Reusable
- Recyclable
- Hygienic
- Water-resistant
- Non-toxic and resistant to chemicals
- Gripped bottom promotes traction between the product and the stair
- Gripped top promotes traction between the product and footwear

34" wide, fits 10-11.25" Stair Depth - PLS SS 34
40" wide, fits 10-11.25" Stair Depth - PLS SS 40

*Use caution when installing, securing, and using any temporary stair protection products to ensure user safety. Test product before every use. Ensure surface is not wet and is free of dust and debris. Instructions: Sweep or vacuum all debris from surfaces to be covered. Place Stair Shield™ on stair, using adjustable fold creases to ensure proper fit. Fold bullnose down. Tape edges of Stair Shield™ directly to stair; consult flooring manufacturer for recommended tape. Ensure product is adequately secured, not wet, and no visible debris is on the product; Test prior to use.
